

# PHARMA

## Special Application

LED Pharma is a hygienic LED luminaire for pharmaceutical and controlled indoor environments, including clean rooms, laboratories, hospitals and operating areas.

The design supports easy cleaning and strict hygiene requirements. Uniform diffused illumination with high color quality ensures accurate visibility, while switchable Amber / White light enables safe handling of light-sensitive medications.

Durable construction, efficient output and flexible configurations support reliable long-term operation in pharmaceutical and laboratory applications.

### LED Pharma A

### LED Pharama B

	LED Pharma A	LED Pharama B
<b>Input power</b>	50 W	25 W
<b>Light Output (Lm)</b>	6 000	3 000
<b>Dimensions (mm)</b>	675x675x120	675x340x120

### Options and Extras:

- Optional switchable Amber / White light
- Emergency lighting module available
- Directed light distribution for task-critical areas
- Automatic internal thermal protection
- Powder coated metal with tempered glass
