LINERA

**Industrial and Retail
Office**

NEW

LINERA is a versatile linear LED luminaire for professional indoor applications. Suitable for retail and office spaces, industrial facilities, airports and covered sports areas.

The flexible optical system allows multiple light distribution options. It delivers efficient illumination across different ceiling heights and layouts. Ensures uniform brightness and high visual comfort within the same space.

LINERA features IP65 protection - uncommon for indoor linear luminaires. Suitable for environments with dust and increased humidity. Ideal for production halls, logistics

Robust construction ensures reliable operation. Long service life. Stable and consistent performance. A dependable choice for demanding projects.

Options and Extras:

- Seven Light Distribution options
- Tunable White
- Optional Dimmable DALI
- Emergency lighting option
- Sensor and system integration option
